l.officer@zimstat.co.zw	Leonard Officer	MEMBER	Statistical Officer	ICT Section	Head of ICT
p.officer@zimstat.co.zw	Pamela Officer	MEMBER	Enumerator Supervisor	Surveys	Field Supervisor

Walk-throughs

Flow	Raise as	Then act as
T&S advance (TSA)	l.officer	ict.head (recommend) → finance.officer or accountant (certify balance, comment required) → dg or director.finance (approve) → finance.officer (disburse)
T&S expense claim (TSC)	p.officer, attach receipts	field.supervisor (certify) → any Finance officer (checked / not previously paid) → accountant or director.finance (pass for payment) → internal.audit (examine)
Application for Leave (LV)	p.officer	field.supervisor (recommend) → surveys.head (approve) → registry (record and file)
Annual leave / off days (AL)	l.officer	ict.head (recommend) → ict.head (approve; same person as section head) → registry (record). The balance panel shows 9 of 12 days remaining after the seeded 3-day leave
Service desk	l.officer logs a case under ICT support; it is auto-assigned to the least-busy ICT officer	drag it across the board as ict.head or the assignee; add a public update; resolve; rate it from /track as the reporter
Public portal	open /report without logging in, pick "Statistical data request", give a phone or email	surveys.head or p.officer sees it on the board; the reporter tracks it at /track
WhatsApp (sandbox)	Settings → WhatsApp as ict.admin: send “Hi”, tap Report an issue → category → type a description → Skip → Stay anonymous → Submit	the case appears on the board with source WhatsApp; Track a report lists it
Internal memo	anyone	section head → DG (only when "Requires Director General's approval" is ticked)
Advances ledger	ict.admin or director.finance: Resources → Advances ledger. TSA-…-0001 (Leonard Officer, USD 870) is open and overdue	record a cash refund or salary recovery with "Clear"; raise and approve a new TSA as above and watch an advance open; raise a TSC as l.officer listing that reference under "Advances received", attach a receipt, approve through ict.head → director.finance (×2) → internal.audit and the advance is cleared
Leave calendar	anyone: Work → Leave calendar; February shows Leonard's approved leave, December shows Pamela's pending application	as hr.head or ict.admin open the Leave register tab and export CSV; add public holidays under Settings → Organisation
Notice board	anyone: the pinned circular and the ICT policy need acknowledgement; the home page lists them	press "I have read and understood"; as ict.admin open Manage, create a notice for one section with acknowledgement required, then open it to see who is outstanding

Flow	Raise as	Then act as
Asset register	ict.admin or ict.head: Resources → Asset register (10 items; ZS/ICT/0041 is in repair and linked to the Wi-Fi case)	issue ZS/ICT/0043 to an officer, return it, send it for repair; as l.officer see "Issued to me"; link an asset from a case's Details tab
Fleet & trips	hr.head, surveys.head or ict.admin: Resources → Fleet & trips. VR-…-0001 is waiting for a vehicle	Assign GZ 4471 or GZ 4472 (GZ 3310 is in maintenance), Start with the odometer, Complete with the closing reading and fuel; submit a new Vehicle request as p.officer and approve as surveys.head → registry to see it arrive on the board

Seeded data: five service-desk cases (ZS-…-0001 to 0005: data request, ICT, access, facilities, field complaint); one approved TSA (Kadoma, USD 870, ZDHS project), one TSC awaiting Accounts (MICS), one approved 3-day annual leave, one vacation leave awaiting the supervisor.

Notes

- Seed passwords are public. Reset or deactivate these accounts before go-live, or run without the seed and create staff under People.
- Two-factor authentication is off for every seed account; enable it under Profile → Security.
- The seed is idempotent: it skips if the `zimstat` organisation already exists.
